RESEARCH, SERVICE AND TEACHING INTERESTS

As a community intervention social scientist with doctoral level training in the field of health education/public health, my research interests have focused on understanding community-level dynamics which impact health, and researching the effectiveness and translation of community interventions to improve health. With contributions as a theoretician and an applied field researcher, I have focused on the role of community empowerment, participatory research methodologies, and capacities as both processes and intermediate outcomes to improving community infrastructure, policies, practices, and programs in order to ultimately have an effect on improved quality of life.

Specifically, I have worked since 1980 in adapting empowerment approaches to the fields of adolescent prevention, occupational health and safety education, women's health, WHO healthy cities and municipalities, and community capacity and social capital within tribal communities. In my work as an intervention scientist, with my research team from the Center for Participatory Research, we have adopted a participatory evaluation and research approach, with an interest in understanding the benefits and challenges of participatory research in community settings. My recent articles and co-edited book (2003 and 2008) epitomize my national and international contribution to the field of Community-Based Participatory Research (CBPR) and Community Engaged Research (CEnR).

Within the field of adolescent prevention, I have worked from both a risky behaviors perspective and a positive youth development orientation. As faculty director of the empowerment-intervention, the Adolescent Social Action Program (PI of NIAAA RO1 grant), I developed measures of youth self-efficacies in group processes as well as changes in risky behaviors. As a participatory evaluator for youth policy development programs, I developed measures of youth collective-efficacy, leadership, and advocacy. Similarly, for the Women to Women HIV-prevention program, program staff and I have co-developed measures for women's empowerment as part of a comprehensive evaluation strategy.

In the 1990s, I led a participatory evaluation effort with New Mexico's healthier community's initiatives, leading to research results as well as a participatory evaluation workbook. This workbook has served as one of the bases for a collaborative effort with the Pan American Health Organization to develop a participatory evaluation methodology and Resource Kit for the Americas: Latin American through Canada. My efforts to identify and assess culturally appropriate indicators for social capital and community capacity in tribal communities (funded by CDC) has led to further collaboration to assess organizational public health infrastructure within several New Mexican tribal communities in partnership with several intertribal organizations and tribes (funded by CDC and NIH/IHS through NARCH funding.) I have produced a significant contribution of scholarly work and peer reviewed publications in my field of health education, in all of the international and national scholarly journals.

My current research has returned to translational intervention research in the collaborative development of family and youth prevention programs (the Family Listening/Circle Program (FL/CP), and RezRIDERS) with tribes to improve health and reduce substance-related disparities through cultural revitalization and building resilience. Funded initially by pilot grant mechanisms, both interventions have been funded by the National Institute of Drug Abuse (NIDA): FL/CP as a 2014-2019 RO1 intervention trial (Wallerstein and Belone co-PIs) with three tribes (Mescalero Apache, Ramah Navajo, and Pueblo of Jemez); and RezRIDERS as an R34 development and feasibility assessment with Jemez (Wallerstein PI: 2013-2016) and Santa Clara Pueblo with the Department of Justice (Rae PI: 2014-2016).

I founded the Center for Participatory Research in 2007 to consolidate our CBPR

approach within the state; and have deepened my inquiry into the added value of Community Based Participatory Research in intervention and policy research in last fifteen years. Funding from NIH since 2006 has facilitated national collaboration to develop a CBPR conceptual model and to assess facilitators and barriers of effective partnership processes to contribute to reduced health disparities. (funding from the National Institute for Minority Health and Health Disparities (NIMHD), Native American Research Centers for Health (NARCH), and collaborations with Indian Health Service, NIDA, NCRR, OBSSR, NCI, and NIGMS. I have a current RO1 by National Institute of Nursing Research (2015-2020) to extend testing of our CBPR conceptual model and refining measures and metrics of community-academic research partnering practices and outcomes.

My service activities have dovetailed with and been strengthened by my research efforts. As a participatory and applied researcher, I have sought to provide the research results back to the communities and program staff to improve programs, services, practices, and to foster strategic planning to improve health infrastructure and reduce health disparities of communities of color. I have also worked closely at the state and regional level with a variety of public health agencies, community non-profit agencies, community councils, tribes, the Indian Health Service, and other Universities among others, as well as internationally, to support those initiatives to improve collective health.

Curriculum and education efforts since 1994 have focused on founding and building the Masters in Public Health Program, teaching basic behavioral and social science and intervention principles, empowerment education, community development, community based participatory research as well as continuing to offer mentorship and teaching to junior faculty of color and pre-doctoral students (in Psychology, Sociology and Public Health through the Southwest Addictions Research Center and RWJF Center for Health Policy) and to fellows, residents, medical and public health students. I have led and participated in several collaborative efforts: a public health certificate for family practice residents and medical students, development of a joint MD/MPH and MSN/MPH degree, research training for fellows, regional Maternal Child Health training with six Universities in the four corners states, and a successful MPH satellite in Shiprock to serve the Indian Health Service and Navajo nation (with a graduation of 18 primarily Native students). The goal of my educational efforts has been to strengthen public health capacity for professionals and community members within the region. I contributed substantially to the \$18.5 million Robert Wood Johnson award to UNM (2007-2012) to establish a national Center of Health Policy for Native, Latino and other underrepresented minorities to provide Ph.D. level training in the social sciences with an integration of public health and health policy. I am currently a Senior Fellow for the Center for Social Policy.

Two special educational commitments include: 1) the UNM annual "Summer Institute of Community Based Participatory Research," participatory workshop since 2009 for graduate students, post-doctoral fellows, clinical and social science faculty, and community partners with participation nationally and internationally; and 2) the collaborative 40-hour train the trainers curriculum, "Empowerment, Social Participation, Participatory Research and Health Promotion," in three languages (English, Spanish, Portuguese). <http://cpr.unm.edu/curricula--classes/empowerment-curriculum.html>. This 40-hour training is currently under revision for a 2019 third edition with Latin American colleagues (Chanchien-Parajon with Mendes, Santana, and Hinshaw).

Tassy Parker, PhD, 2006- 2011, Mentorship on grants to NIMH and RWJ on CBPR approach to identifying culturally based guidelines for depression treatment in primary care clinics for Native American women.

Bowen Chung, MD., 2006- 2009. Requested by Dr. Chung, an RWJ Clinical Scholar at the UCLA Center for Mental Health Research, to serve as consultant for his Witness for Wellness CBPR grant to NIMH.

Sarita Mohanty, MD, 2006-2009. Requested by Dr. Mohanty, an RWJ Clinical Scholar at the UCLA Center for Mental Health Research, to serve as consultant for K award to NIMH in CBPR.

Celia Iriart, Ph.D., 2001- 2012. Have provided opportunities for Dr. Iriart to teach Masters in Public Health students and residents, and have recently become involved in mentorship on grant opportunities. I encouraged her to submit a pilot project within the Southwest Health Disparities Center and Southwest Addictions Research Grant (Wallerstein as P.I.), and have provided editing and consultation on the development of grants to the Agency for Health Care Quality and Research.

As Principal Investigator for the Southwest Addictions/Alcohol Research Group (2003-2007), have mentored 8-10 interdisciplinary minority junior faculty and post-doctoral students in providing conceptual, editing, and methodologic support for their research applications, their presentations to national conferences, and publications. Also created supportive environment for junior faculty and students of color in dominant culture academic environment. Mentorship continues with publications and grant submissions.

Billie Jo Kipp, Ph.D., 2004- 2007. Supported Dr. Kipp to finish her dissertation, to apply for pilot grants with the Southwest Addictions Research Group, and currently to conduct Community Based Participatory Research with her tribe, the Blackfeet of Montana.

Andrew Rowland, Ph.D., 2002- 2006. Recruited and have mentored Dr. Rowland in his faculty position as of Fall, 2001. Provided one year funding for a research assistant position. Meetings on potential research directions. Provided program support for Dr. Rowland to apply for a CDC PERT grant and supporting letter for his successful application for University Research Allocation Contract funding and for his NIMH funding.

Lily Dow Velarde, Ph.D., 2002 – 2006 (also 1990-1999). Recruited and have mentored Dr. Velarde as full-time faculty in 2002. Meetings on potential research directions and new grant opportunities. Provided the opportunity for Dr. Velarde to submit a pilot project for the Health Disparities Center. Collaboration on several publications on the Adolescent Social Action Program (in particular, supported Dr. Velarde to be first author of chapter in adolescent book.) As a pre-doctoral student in the 1990s, Lily Velarde successfully wrote and received a minority supplement to do a research project on Photonovelas with Youth as a result of Wallerstein's NIAAA RO1 funding mechanism. This turned into her dissertation with the Health Education Program, U.N.M.

Rosilda Mendes, PhD., 2006. Sponsored Dr. Mendes as post-doctoral scholar from the University of Sao Paulo, Brazil for a six month internship at UNM.

Lorraine Halinka Malcoe, Ph.D., 1997- 2005. Recruited and mentored Dr. Malcoe in all aspects of academic life, including education, scholarship, and research. Provided Dr. Malcoe with opportunities to participate on research grants, as co-core leader of the Population Health Core for the NIEHS grant, and as epidemiology core leader for the Health Disparities grant. Provided MPH program support and mentorship for Dr. Malcoe's successful application for the University Research Allocation Contract funding.

Bonnie Duran, Dr.P.H., 1996 – 2003. Recruited and mentored Dr. Duran in all aspects of academic life, including education, scholarship, and research. As Principal Investigator of the NIAAA RO1 was able to provide Dr. Duran the opportunity to successfully write and receive a minority supplement to do a research project on cultural differences in youth resiliency. Included Dr. Duran as co-Principal Investigator and collaborator on several grants: the CDC Social Capital Grant and the NIGMS/I.H.S. NARCH grant. Provided MPH program support and mentorship for Dr. Duran's K award (2001-2006). Mentorship has become transformed to collaboration in multiple grants, scholarship and writing projects.

Jeanne Miranda, Ph.D., 2002-2004. Requested by Dr. Miranda to serve as her community intervention and participatory research mentor for her application to NIMH. Although not funded in the first cycle, Dr. Miranda has received ongoing consultation and mentorship in several pilot projects with Hispanic communities in mental health services research.

Gayle Dine Chacon, M.D., 2000-2004. As Dr. Chacon has become increasingly interested in public health research, have met with her to provide public health frameworks, and involved her in research discussions. I edited and provided consultation on her faculty development grant for the NARCH.

Regina Pontes, Ph.D., 1999-2005. Sponsored Dr. Pontes dissertation research as a visiting scholar from the University of Sao Paulo, Brazil. Assisted in her data collection and analysis and facilitated the completion of her dissertation.

Michele Polacsek, Ph.D. 1996-2000. When Dr. Polacsek was a research faculty at University of New Mexico, involved her my healthier communities research efforts, provided opportunities for co-presentation at national meetings, provided opportunity to participate as co-author on several publications, including Participatory Workbook for Evaluation of Healthier Communities, and the recent research publication in Health Promotion Practice.

From 1984 until the start of the MPH Program in 1994, Dr. Wallerstein actively taught and developed curriculum for medical education blocks in community medicine, social determinants of health, health promotion and wellness, occupational health and substance abuse prevention. She has participated in multiple population health task forces to develop Health of the Public curriculum. As the MPH Program became more demanding by 1998, she reoriented to infusing public health skills and training opportunities in post-graduate medical orientation. She has actively solicited medical students, residents, fellows and faculty into the MPH Program or to take individual classes to build public health skills. Developed the dual MPH/MD degree, and supported the development of the Public Health Certificate for medical students.

Curriculum Development and Educational Administrative Positions:

As director of the Masters in Public Health Program between 1994 and 2007, I oversaw the growth and development of the graduate curriculum, which now includes close to 70 courses, with concentrations in epidemiology, community health, and health systems and policy. The program consists of 10 core faculty, many adjunct teaching faculty, over 50 preceptors and mentors, and 15-22 admitted students annually, 120 graduates (as of 2006), with additional hundreds of enrollments annually of non-degree students.

I took the MPH through two successful accreditation site visits. In 1996, after two years of operation, the MPH received a full five years of first-time accreditation. In 2001, the MPH received a full seven years of its reaccreditation.

I oversaw the satellite MPH Program in Shiprock, New Mexico which served the Navajo Nation and the four corner region in the Southwest (20 students, 13 Native).

Currently, as a senior fellow for the new Robert Wood Johnson Health Policy Center to provide PhDs to Native, Latino, and other underrepresented minorities in the social sciences with integrated public health and health policy training. I serve on the leadership council and am an active mentor of pre-doctoral students in their journal club.

Mentoring of Faculty in Education:

For each of the faculty of the MPH Program, I am available to provide mentorship and oversight as regards to the curriculum content and teaching methods. When I was MPH Program Director, I reviewed teaching evaluations every semester, listen to student comments, and was also open to discussions with any faculty on a proactive basis. In this capacity, I met with Drs. Duran, Malcoe, Waitzkin, Tollestrup, Rowland, Iriart, Velarde, and Fairbanks, among other adjunct faculty. I continue in an informal basis to meet with faculty as requested; and support Dr. Tollestrup as Program Director. I also have provided faculty workshops for the MPH faculty in areas of expressed interest, including: Problem-Based Tutoring and Case Development, Integration of Communication Skills; Integration of Writing Skills; Integration of Critical Thinking Skills.
